### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

*Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 50, 51, 52, 55-61 are rejected under 35 U.S.C. 102(b) as being anticipated by Swartz et al. (Pat No 6,017,009).

The patent to Swartz et al. discloses a support system, comprising:

a support post; a wedge member (20), having a tapered portion, located on said support post (12); and support means (16) for adjustably supporting a member to said support post, said support means including a locking mechanism (18) movable between a first position for press-fitting said wedge member against said support post and a second position for releasing the press-fitting, said locking mechanism having a surface that abuts said wedge member when in the first position thereby to effect said press-fitting and that is released from said wedge member when moved to said second position to

release said press-fitting. The collar means having a shaft (34) for receiving the locking mechanism.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 53, and 62-64 are rejected under 35 U.S.C. 103(a) as being unpatentable over Swartz et al. The specific shape of the post, and the mating surfaces of the wedge and the post are considered to be obvious matter of engineering choice having no patentable significance.

***Allowable Subject Matter***

Claims 67-75 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Nakatani (4,596,484) and Riblet (6,126,127) show other devices of interest.
